VASANTH RAJ RAJARAJAN

AWS & DevOps Engineer

Location Chennai, Tamil Nadu, India | **Mail Id:**vasanthrmkv@gmail.com |
Mobile: +91 8015728221
Linkedin URL: https://www.linkedin.com/in/vasanth-raj-rajarajan-b87b7131b

SUMMARY

Results-driven AWS & DevOps Engineer with 5+ years of IT experience, including 4+ years in DevOps and AWS cloud engineering. Specialized in designing scalable cloud-native infrastructure, automating CI/CD pipelines, and deploying containerized applications on Kubernetes (EKS). Proven track record of improving deployment frequency, reducing infrastructure costs, and enhancing system reliability through automation and monitoring.

SKILLS

Cloud Platforms: AWS (EC2, Auto Scaling, ALB/ELB, S3, VPC, Route53, IAM, RDS, DynamoDB, EBS, Redshift, EKS)
DevOps & CI/CD: Jenkins, GitHub Actions, AWS CodePipeline, Maven
Infrastructure as Code: Terraform, AWS CloudFormation, Ansible
Containers & Orchestration: Docker, Kubernetes, Helm, Amazon EKS
Monitoring & Logging: Prometheus, Grafana, SonarQube
Version Control: Git, GitHub
Scripting & OS: Bash, Python, Red Hat Linux

EXPERIENCE

Independent DevOps Consultant — September 2024 – Present

Freelancing

Designed and implemented end-to-end CI/CD pipelines for containerized microservices, increasing deployment frequency by 60% and reducing manual release effort by 70%.

Provisioned AWS infrastructure using Terraform (VPC, EC2, ALB, Auto Scaling Groups, EKS), reducing environment setup time from days to under 1 hour.

Implemented modular Terraform architecture with remote backend and state locking to ensure secure and collaborative infrastructure management.

Built optimized Docker images, reducing image size by 30% and improving container startup time by 25%.

Deployed applications on Kubernetes (EKS) using rolling and blue-green strategies, ensuring zero-downtime production releases.

Implemented Prometheus and Grafana monitoring stack, improving incident detection time by 40%.

Designed cost-optimized disaster recovery strategy using multi-AZ architecture and automated backup workflows, reducing standby infrastructure cost by 35%.

Enforced IAM least-privilege policies and hardened security groups, improving overall security posture.

DevOps Engineer **April 2022 – August 2024**

Merit Nano Digital Solutions, Chennai.

Designed and maintained CI/CD pipelines using Jenkins, GitHub, Maven, and AWS CodePipeline,reducing deployment errors by 50%

Automated infrastructure provisioning using Terraform and CloudFormation, ensuring consisten multi-environment deployments (Dev, QA, Prod).

Managed Kubernetes workloads on Amazon EKS, including Helm-based deployments and HPA configuration, improving application scalability and resource utilization by 30%.

Integrated SonarQube quality gates into CI pipelines, increasing code quality compliance by 45%.

Implemented centralized monitoring with Prometheus and Grafana, reducing production incident resolution time (MTTR) by 35%.

Automated routine operational tasks using Python and Bash, reducing repetitive manual tasks by 60%.

Associate DevOps Engineer **July 2020 – April 2022**

Merit Nano Digital Solutions, Chennai.

Designed and deployed secure AWS infrastructure within custom VPC architecture with public/private subnets and RDS integration.

Built Jenkins pipelines for automated builds and deployments, increasing release frequency from bi-weekly to weekly cycles.

Automated server provisioning and configuration using Ansible playbooks and reusable roles, reducing configuration drift by 40%.

Provisioned and scaled Kubernetes clusters on AWS EKS, optimizing compute utilization and reducing over-provisioning costs.

Implemented disaster recovery strategies ensuring high availability and minimal data loss.

Technical Support Engineer **January 2019 – June 2020**

Merit Nano Digital Solutions, Chennai.

Provided L2/L3 technical support for infrastructure and application issues, improving SLA adherence.
Troubleshot Linux server, networking, and deployment-related issues, reducing escalation rate

KEY ACHIEVEMENTS

Reduced deployment time from hours to minutes through end-to-end CI/CD automation.

Improved infrastructure consistency and eliminated manual provisioning errors through Infrastructure as Code.

Enhanced production stability with proactive monitoring and alerting systems.

Successfully managed containerized workloads in production Kubernetes environments.

Delivered multiple **freelance DevOps projects end-to-end**, handling architecture design, CI/CD implementation, containerization, infrastructure provisioning, monitoring setup, and deployment automation across AWS environments.

EDUCATION

Bachelor of Technology in Civil Engineering

Periyar Maniammai University • Thanjavur, Tamil Nadu • 2017
